

PIKOLIN AND STANDARDS ASSOCIATIONS

Pikolin has worked actively to create a body that will defend the interests of the mattress, divan and bed frame and base sector. AENOR and Asocama have created a technical committee to establish the standards for mattresses, bases and accessories.

Its objectives are: to draft standards defining the products, their characteristics, their safety and their suitability for the purpose for which they were manufactured.

Pikolin also participates actively in the European Committee for Standardisation (CEN), which aims to harmonise the different existing European standards, and to create new standards for mattresses and bases.
