

PIKOLIN'S RELATIONSHIPS WITH THE FEUZ AND THE ITA

Pikolin collaborates closely with two important Aragonese organisms: THE FEUZ AND THE ITA.

The Zaragoza University Business Foundation (FEUZ) is a body which cooperates with companies in order to finance research and studies which are of use to both.

Since 1983, Pikolin and the FEUZ have collaborated on numerous projects related to firmness, and also on the first study of sleep and muscle tone, as well as diverse studies researching into new technologies.

Pikolin also collaborates closely with the Aragon Technological Institute (ITA) - which is part of the Aragonese Government's Department of Science, Technology and University - with the aim of promoting the development of new technologies and their application to the world of sleep products.
